A Critical Analysis of Russian Media Freedom

Since the collapse of the Soviet Union, Russian media freedom has been a contentious and contested subject within Russian society.

Following the Soviet Union's demise there was a renewed emphasis of media freedom under the Gorbachev presidency.

However, this renewal was short lived following Gorbachev resignation and Vladimir Putin's rise to power.

Putin has once again curtailed the media liberties that were accepted in Gorbachev's tenure. This essay will analyse the historical changes in media freedoms in Russia and address the current relationship between the Russian institutions and legislation of the media. In addition, this essay will investigate how formal and informal actors apply restrictions on the media to enforce subordination to the Russian state.

To accomplish this, this work will analyse comparatively different media systems to see how Russian media relations compare. This will include Russia's new legislation regarding social media. Finally, concluding by providing a definitive position on the current state of media subordination within Russian society.

Once you are happy with the work you have written click 'Submit assignment to teacher'.
